ABDUL GHOFUR ALMIQBADI

Software Developer · Frontend, Full Stack & IoT

abdulghofuralmiqbadi2@gmail.com | +62 858-5215-4752 | Malang, Indonesia

PROFESSIONAL SUMMARY

D4 Informatics Engineering student at Politeknik Negeri Malang with a 3.78/4.00 GPA and experience building web applications from interface to database, Flutter mobile apps, and IoT device fundamentals. Comfortable leading small teams, structuring maintainable code, and turning user needs into clear, responsive interfaces.

TECHNICAL SKILLS

Programming languages PHP, JavaScript, Dart, Python, SQL, HTML/CSS, C++
Frontend Blade, Tailwind CSS 4, Vite, Flutter, Material 3, responsive layout, basic accessibility
Backend & databases Laravel 12, Filament 5, native PHP, MySQL, REST API, Sanctum, authentication and authorization
IoT & embedded ESP32/Arduino basics, sensors and actuators, MQTT, microcontrollers (Skilvul certification)
ML & tools Python, YOLO, data annotation, Git, GitHub, Composer, Android Studio, Figma, PHPUnit

EXPERIENCE

Sign.L - Sign Language Learning App

Aug 2026 - Present

Project Manager & Developer · Team of 5 · Flutter, Provider, camera, ML model

- Lead a five-person team, split work by module, and enforce a thin-controller/service-layer architecture so UI code never calls the model or network directly.
- Built the learning-path, material, and camera screens in Flutter with Provider, then prepared the BISINDO classifier and the crop/resize/normalize pipeline feeding on-device camera inference.

KeJepret - Race Photo Marketplace

Feb 2026 - Jun 2026

Web Developer, frontend with backend integration · Team of 4 · Laravel 12, Blade, Tailwind CSS 4, MySQL

- Built the Blade and Tailwind interface on Laravel 12 for runner face-search, cart, checkout, and photographer dashboard flows.
- Connected the views to Laravel controllers and API endpoints, keeping them in sync with the Filament admin panel and an external FastAPI face-search service, including watermarked previews and paid-download states.

Laboratory Profile Website

Oct 2025 - Dec 2025

Web Developer, frontend and backend · Team of 6 · PHP, MySQL

- Built the public site in PHP on a view/controller/model split: home, about, catalog, gallery, news, lecturer, and student-work pages.
- Implemented the admin area for gallery, news, and catalog content, including the controllers, queries, and validation behind each screen.

EDUCATION

Politeknik Negeri Malang - D4 Informatics Engineering

2024 - present

GPA 3.78 / 4.00 · Relevant coursework: Web Design and Programming, Advanced Web Programming, Databases, Advanced Databases, Object-Oriented Programming, Algorithms and Data Structures, Software Engineering, Interface Design, Computer Networks, Network Administration and Security, Artificial Intelligence, Machine Learning, Image Processing and Computer Vision, Mobile Programming, Project Management, Software Quality Assurance

CERTIFICATIONS & TRAINING

Building LLM Applications With Prompt Engineering - NVIDIA - Jan 2025
Internet of Things: Fundamentals / Hardware / Software & Platforms - Skilvul - Jun 2023
Python Dasar, Python Lanjutan, Algorithm & Data Structures with Python (Gold) - Skilvul - Mar 2023
Flutter for Beginners, Dart, Programming Logic 101 - Dicoding - Oct 2023

ADDITIONAL

Languages Indonesian (native), English (intermediate)
Organizations Research and Talent Department staff at HMTI Polinema (2025-2026), chaired the 2025 work meeting and ten committee roles; Programming staff at Polinema Robotics (2024-2025), training object-detection models for robot navigation; social media admin at RISEUPTVID Network (2023-2024).
Interests Interface design, accessibility, Internet of Things, and machine learning.
