ABDUL GHOFUR ALMIQBADI

Frontend Developer — Web & Mobile

Malang, Indonesia · +62 858-5215-4752 · abdulghofuralmiqbadi2@gmail.com · github.com/furalmiqbadi · furalmiqbadi.github.io

PROFESSIONAL SUMMARY

D4 Informatics student at Politeknik Negeri Malang (GPA 3.78/4.00) and frontend developer on three team projects: a PHP lab profile site, a Laravel photo marketplace, and a Flutter sign-language app where I also lead the team and own the on-device model. Comfortable working in an existing codebase and shipping on a fixed semester deadline.

TECHNICAL SKILLS

Languages: PHP, Dart, JavaScript, SQL, HTML/CSS

Frontend: Blade, Tailwind CSS 4, Vite, Flutter, Material 3, responsive layout

Backend: Laravel 12, Filament 5, MySQL, REST API, Sanctum

Machine learning: TensorFlow Lite, on-device inference, image preprocessing, prompt engineering

Tooling: Git, GitHub, Composer, Android Studio, Figma, PHPUnit

EXPERIENCE

Sign.L — Sign Language Learning App

Aug 2026 – Present

Project Manager, Frontend, ML Engineer · Team of 5 · Flutter, TFLite

- Lead a five-person team on a BISINDO learning app, splitting work by folder and enforcing a thin-controller/service-layer architecture so UI code never calls the model or network directly.
- Built the learning-path, material, and camera screens in Flutter with Provider state management, and prepared the TFLite classifier for the 26 BISINDO alphabet signs plus the crop/resize/normalize pipeline feeding inference from the device camera.

KeJepret — Race Photo Marketplace

Feb 2026 – Jun 2026

Frontend Developer · Team of 4 · Laravel 12, Blade, Tailwind CSS 4

- Built the frontend in Blade and Tailwind over Laravel 12 for the runner face-search, cart, checkout, and photographer dashboard flows, keeping views in sync with the Filament admin panel and an external FastAPI face-search service.
- Connected watermarked photo previews, search results, and paid-download states to the Laravel controllers and API endpoints.

Lab Profile Website

Oct 2025 – Dec 2025

Frontend Developer, with backend contributions · Team of 6 · PHP, MySQL

- Built the public site in PHP on a view/controller/model split: home, about, catalog, gallery, news, lecturer, and student-work pages.
- Implemented the admin area for managing gallery, news, and catalog content, including the controllers and queries behind each screen.

EDUCATION

Politeknik Negeri Malang — D4 Teknik Informatika

GPA 3.78 / 4.00 · Coursework: web programming, database systems, mobile programming, software engineering
2024 – 2028 (expected)

CERTIFICATIONS & TRAINING

Building LLM Applications With Prompt Engineering — NVIDIA, Jan 2025

Internet of Things: Fundamentals / Hardware / Software & Platforms — Skilvul, Jun 2023

Python Dasar, Python Lanjutan, Algorithm & Data Structures with Python (Gold) — Skilvul, Mar 2023

Flutter for Beginners, Dart, Programming Logic 101 — Dicoding, Oct 2023

ADDITIONAL

Languages: Indonesian (native), English (professional working proficiency)
